WSU Fall 1975

alum

A New Name

On August 1, 1975 Winona State College officially became Winona State University. One result of that change is that this publication can no longer properly be called "WSC Alum." So, as of this issue, after exactly five years of publication, "WSC Alum" becomes "WSU Alum."

FALL 1970

A Quarter's Worth

Intern Business

Getting students out of the classroom and into the field as part of their education is a current trend in higher education. Internships are one way of doing this. Many of Winona State's academic departments now offer internships to juniors and seniors as an option for fulfilling program requirements. The Department of Business Administration and Economics is one of the departments with a very active internship program.

Business internships help both the student and the participating employer. The student gets valuable on-the-job experience -- a chance to apply what he has learned in the classroom. This, understandably, is a strong plus when it comes time for him to seek employment. On the other hand, the employer benefits from the student's work, gets a good look at a potential employee, and as Dr. J.H. Foegen, professor of business at Winona State, points out: "They get a keenly-interested, outside evaluation of some of their traditional ways of doing business. Some of the interns have suggested ways of cutting costs and increasing efficiency."

Students have interned in several Minnesota and Wisconsin communities in a variety of jobs. Some of the internships have been in LaCrosse, Wisc., Minneapolis, St. Paul, Rochester, Pipestone and Winona, to name a few. Interns have worked in such diverse establishments as hospitals, hardware stores, banks and motor inns -- sometimes for pay, sometimes for work experience and college credits only.

The business internship, like internships offered by several other Winona State academic departments, is roughly equivalent to the student teaching experience offered by the education department. It is offered to juniors and seniors to give them practical experience in their field before they confront the job market. Yet, as former business intern Larry Briske found out, it can have even more immediate rewards: after

interning with the Rochester Block and Supply Co., the firm hired him full-time in its accounting department.

Both the interns and the employers have expressed satisfaction with the results. Thomas Kilian, personnel director for the Rochester Methodist Hospital, has worked closely with Winona State interns and is enthusiastic. "They have shared new ideas with us," he says, "and really have dug in and worked hard." He describes the interns' progress as "exciting to watch." Meanwhile, Harry Nevling, a former intern, describes Kilian as "very generous" in helping his interns.

"It's working out so well," Dr. Foegen adds, "that we wonder why we didn't start it decades ago."

Education and the Mail

The U.S. Postal Service is revoking many college and university second-class mailing permits that allegedly are not being used as the law intended. The Postal Service claims that catalogs and other materials mailed by educational institutions don't qualify as periodical publications and, therefore, should not be mailed second class. The claim is based on a 1904 Supreme Court decision defining periodical publications.

Educational institutions generally mail a variety of publications as second-class bulletins -- from catalogs to alumni magazines. They've been doing it for years. However, according to the Postal Service, these publications are not consistent with the Supreme Court's definition of periodical publications. So the Postal Service is systematically reviewing college and university mailing permits, applying the new, stricter definition of "periodical publication." As of June 1975, it had revoked permits in 84% of the cases it had reviewed.

The loss of second class mailing privileges heaps an additional burden on already strained college budgets. Even if they retreat to the less-desirable third-class mail, colleges will spend much more for mailing. Estimates for some schools are as high as \$18,000. On the other hand, first-class rates would push the cost even farther out of sight for many schools.

How, or if, the policy will effect Winona State is still unknown. Complete loss of second-class privileges would effect several publications, including "WSU Alum." If that should happen, Winona State probably would have to re-examine its mailing priorities.

The move to revoke permits began within the Postal Service itself; congress or the courts did not demand it. A 1912 law allowing public taxes to subsidize educational mail has been the guideline used up to now. Even the 1970 Postal Reorganization Act, which demanded an examination of all postal policies, did not cause a change in policy. And congress has continually subsidized the approximately 25% of cost the institutions do not pay.

Congress might reverse the new policy through legislation. Senator Thomas Eagleton (D-Mo.) has introduced a bill that restates the 63-year old policy allowing colleges and universities to mail materials second-class. He is trying to gain enough support in the Senate to persuade the Senate Sub-committee on Postal Operations to consider the bill. In the House, Rep. William Ford (D-Mi.) has authored a similar bill. Some observers feel the fate of the two bills rests chiefly upon the amount of support they receive from interested citizens and organizations prior to congressional action.

The "E" is Back

In May the Academic Affairs and Curriculum Committee (A2C2) voted to re-instate the "E" grade at WSU. The university dropped the "E," or failing grade, a couple of years ago and replaced it with "NC", or "No Credit". Under that system a student who received an "NC" did not get credit for the course, but the "NC" did not count against his or her grade point average.

A2C2 decided the old way was better. It felt that the "E" grade furthers academic quality by encouraging higher quality work, since it carries a greater penalty for not passing a course than does the "NC" grade.

Comments from the Director

by Ray Amundson

The name of our magazine changes with this issue to WSU ALUM. This coincides with the fifth anniversary of our publication of the WSC ALUM. In November 1970, the first issue was mailed to about 8,000 alumni. I couldn't help but go back and read what I wrote in that first issue with the yellow cover. Following is a quote from that bulletin: "The alumni plays an important role in the growth and development of any viable college. The initial contact with alumni will be through this bulletin which will be published four times a year, once during each quarter. This communications link will provide the alumni with information about their school and will help each alumnus determine how he wants to support his alma mater." During the past five years I believe we have achieved most of our initial objectives. We hope to improve the magazine with each issue and continue to inform the alumni about their alma mater.

One of our most successful sections of our magazine has been "Things We've Heard About You." In that first issue we had a mere page of items which included a report about the annual meeting of the Alumni Society held on June 6, 1970. In the Fall 1974, Winter 1975, and Spring 1975, issues there was an average of five pages devoted to this section. This was accomplished only because the alumni were interested and sent us information to print. In reflecting on this section of our magazine I must print the following article written by Erma Bombeck that she wrote after reading her alumni newsletter. From "At Wit's End" by Erma Bombeck, as published in the *Minneapolis Tribune*, Thursday, May 1, 1975, courtesy of Field Newspapers Syndicate.

"Do you know what depression is, Bunkie?"

It's opening up your alumni newsletter and finding one note under your class: "See: IN MEMORIUM."

I wondered how long it would take the class of '49 to come to this. For a

while we were lousy with achievers. Back in the '50's our news would run an entire page, and that was just the births.

In March 1971 there were only two items under the class of 1949. Margaret Hollenkamp (Lib. Arts) won a showcase of "The Price Is Right" (including a microwave oven) and the alumni secretary was still trying to locate the last known address of Ralph Ordwell who had not turned in his graduation gown.

Being a good sport about the sparseness of news, I started to read the news of the year before and the year after my class, rationalizing it was possible a name might ring a bell. With each month I included a few more years either way. Finally, one day I shouted excitedly, "I knew it! Here's a girl I know and she's enrolling in a graduate course at Ohio State. Wanda Schmidlapp... that son of a gun... still in there improving herself. I guess now the alumni secretary will realize the class of '49 isn't ready to be phased out."

My husband glanced over my shoulder and said, "You're reading the class of '71. That's Wanda's daughter."

I did a strange thing when he told me that. I bit an \$8 Vera scarf in half.

"You're overreacting. You know that," said my husband as I tried to piece the scarf back together again. "If you think there should be more news from your class, just sit down and think what you've done lately and send it in."

"You're right," I said grabbing a pencil. "Let's see, I... no, I told them that 10 years ago... I know I... that's none of their business... I could tell them about... but I'd be lying."

Feeling uneasy, I flipped the pages of the alumni newsletter back to "IN MEMORIUM."

"What are you doing?" asked my husband.

"Thank goodness," I sighed, "It isn't me."

I wrote to the alumni secretary, "Erma Bombeck (Lib. Arts '49) is breathing in and out on a regular basis. SEE CALENDAR OF EVENTS." "

1975 Annual Fund Drive

The fourth annual Fund Drive, launched in May 1975, established a modest goal of at least a \$1.00 gift from each alumnus. We are "creeping" up on the attainment of that goal but we are still looking for the return of many pink donation envelopes. If you can't find your envelope just use the insert card with this magazine and put it in an envelope with your gift and mail it to WSU Alumni Society, Room 217, Somsen Hall, Winona State University, Winona, MN 55987.

Alumni Society Scholarships

In our summer issue we announced that the WSU Alumni Society was planning to establish a new scholarship program for relatives of alumni. Beginning in the Fall quarter of 1976 four \$500.00 scholarships will be awarded to two female and two male high school seniors to attend Winona State University. The following eligibility criteria has been established:

1. Applicant must be graduating from high school in the year in which he applies for the scholarship.
2. Applicant must be a child, grandchild, niece, nephew, brother or sister of an alumnus.
3. Applicant must have applied for admission to Winona State University and submitted a scholarship application by March 1st of the year for the following academic year. (Example: March 1, 1976 for the 1976-77 academic year.)
4. Scholarship is based on the individual applicant's merits, academic excellence, achievement, extra curricular activities, and work experience.
5. Applicant must be endorsed by the alumnus relative.

The applicant will use the form printed on the inside of the back cover of this magazine. Additional copies of the application form are available from the Alumni Affairs Office at WSU. The Board of Directors of the Alumni Society will review all applications and select the recipients. The names of the recipients will be announced at the annual Alumni Society banquet. Recipients will receive their scholarship money at the time of registration. We encourage applications.

"Special Education graduates are prepared to work in a resource room with exceptional children -- either with individuals or with small groups -- as well as with the more traditional special classes."

Developing Special Education at WSU

Winona State University began its special education program in the 1972-73 academic year. This state-certified program was designed to prepare teachers to work with children classified as educable mentally retarded. The program is adjunctive to the elementary education major, providing the opportunity for graduates to be certified to teach educable mentally retarded children as well as regular elementary classes.

It is the Education Department's philosophy that special education is a refinement of learning principles common to all education, not a

separate pedagogical science. Education Department head, Dr. Otto Frank, explains that WSU took this approach 1) to encourage the inclusion of EMR program graduates in regular classrooms by insuring that they have both the general knowledge and the special knowledge necessary to teach a broad range of students, 2) to increase the employment potential of graduating teachers through dual certification, and 3) to eliminate, where possible, duplication of course content.

Special Education graduates are prepared to work in a resource room with exceptional children -- either with individuals or with small groups -- as well as with the more traditional special classes. This flexibility makes these graduates valuable additions to teaching staffs of schools teaching educable mentally retarded children. Two teacher candidates were recommended for EMR state certification in 1972-73, twenty-two in 1973-74 and twenty-eight this past spring. All of them are employed.

In 1973-74 WSU went a step farther in the development of its Special Education program. It began a state-approved program to prepare teachers to work with elementary and secondary learning disabled students (LD). This program responds to a growing need throughout the WSU service area for specially trained, state-certified teachers. Unlike the EMR program, which trains teachers to work with children whose IQs are between 50 and 70, the LD program prepares teachers to work with children who have average or above average intelligence, but who have a learning disability in one or more academic areas. These learning disabilities are often closely associated with behavioral problems.

The philosophy employed in the development of the EMR program has also guided the development of the LD program, with the addition that secondary teacher education candidates could be accommodated. Both the EMR and LD programs may be taken as undergraduate certification minors, as graduate certification concentrations in the Master of Science in Education Degree or for certification by non-degree bound graduate students. In all cases, state certification is for both elementary and secondary teaching positions.

Emphasis during the first year of the LD program was placed upon modifying the skills of in-service teachers, thereby assisting school districts in meeting temporary certification standards for teachers.

The past year (1974-75) was given to continuing this effort and to training pre-service teacher candidates. Approximately 15 teachers have graduated from the LD program to date. All have been employed.

Recent legislation making special education services mandatory in the public schools of Wisconsin and Iowa, as well as increasing special education needs within Minnesota itself, has increased the demand for teachers with specialized skills. The national trend toward placing heretofore excluded children into mainstream classrooms has increased the demand for regular classroom teachers able to teach a broad-based grouping of children. Through its elementary, secondary and special education curricula, WSU is continuing to demonstrate its ability to develop contemporary curricula, responsive to the needs of its service area, which are rooted in a strong tradition of excellence in teacher education.

Department of Education Faculty with Responsibilities in Special Education:

Dr. Wayne Erickson
Dr. Otto Frank

The Educable Mentally Retarded Certification Program

Students pursuing the Educable Mentally Retarded State Certification program or the Educable Mentally Retarded Certification minor must complete 30-33 credits of required courses. All candidates must be elementary education majors and certification is for grades K-12. Included in the required courses are 11 credits of "Fundamental Knowledges," which cover coursework on the exceptional child, the psychology of mental retardation and remedial reading, as well as an introduction to special education. The remaining 19-22 credits must be taken in "Procedural Knowledges." These courses cover the education of the mentally retarded in both elementary and secondary school (with lab work in both areas), directed special education teaching, and individual problems in teaching special education.

Master of Science in Education, Educable Mental Retardation Certification Degree

Those pursuing the Master of Science in Education, Educable Mental Retardation Certification Degree must complete the 30-33 required credits previously mentioned plus 21 credits under the MS certification program. Courses within this program concentrate upon measurement and learning difficulties, classroom organizational patterns, elementary school curriculum, historical foundations of education, and research and writing. The student also selects two advanced methods courses from a list of four: language arts, social studies, elementary science, and elementary math.

Learning Disabilities Program

The Learning Disabilities Certification Program follows a format similar to that for the EMR program. The program requires 42 credits: 30 credits of "Foundational Understandings," 12 credits of "Procedural Knowledges," plus 1-3 credits are offered as "Discretionary Requirements."

Included in the 30 credits of "Foundational Understandings" are courses in personal adjustment, remedial reading, education of exceptional children, childhood language development, and classroom behavioral changes, just to name a few.

The "Procedural Knowledges" courses include the in-depth study of the diagnosis and remediation of learning disabilities.

Master of Science in Education—Learning Disabilities Concentration

Candidates for the MS degree with a LD concentration must complete the 42 required credits for LD state certification. They must also complete 12 credits in the LD Master of Science program as part of the 54 total credits required for the masters degree.

For further information about Special Education programs contact the Department of Education, Winona State University, Winona, MN 55987.

Alumni in the News

Alumnus Named Miss Downtown Minneapolis

In May 1975, Pat Diken, B.A. Business Administration, '74, was named Miss Downtown by the Downtown Council of Minneapolis. She competed with 76 other girls for the title.

As Miss Downtown Minneapolis she will act as a goodwill ambassador for downtown Minneapolis at such events as the Acquatennial and new business openings. Part of her award was a one thousand dollar wardrobe.

A native of Ellendale, Minnesota, she was listed in Who's Who Among High School Students in America in 1970, Outstanding Teenagers of America in 1969 & 1970, and Among College & University Students in America in 1974.

While at Winona State she was a member of the student activity fund committee, appeals committee, band, and treasurer of the student senate.

Presently Miss Diken is an account executive with Campbell-Mithun Advertising Agency, Minneapolis.

Miss Diken

John Moriarity Retires

On July 4th, John Moriarity, B.E. 1931, retired after forty-four years of service in education. Senator Sam O. Solon of Duluth presented him with the following citation from Governor Wendell Anderson:

"Presented to John M. Moriarity, distinguished educator and outstanding citizen in recognition of his dedicated educational, civic and community services which have so greatly advanced the well being of the people of this city and state."

Mr. Moriarity was a teacher and principal in the St. Louis County School System for thirteen years and a teacher, counselor, and principal in the Duluth Schools for thirty-one years.

He was a member of the IMPACE Executive Board, MEA Executive Board, Legislative Committee, Duluth Public Library Board, and the Arrowhead Library System Board.

Mr. Moriarity writes, "I still recall with pleasure my years at Winona State and I enjoy reading about the alumni activities."

Senator Solon and Mr. Moriarity

A Senior Student

Attaining a forty-five year goal for college education was happily culminated at spring commencement exercises at WSC when W.A. "Woodie" Palmen, a sixty-two year old grandfather, received his master of science degree in social science with a concentration in history.

"Chronologically, I was the oldest student in any class during my four and one-half years at Winona State," said Woodie, "but not in spirit, interest and enthusiasm."

While working for a milling company, after graduating from Central High School, Minneapolis in 1930, Woodie decided he would somehow acquire a college education.

He enrolled at the University of Minnesota for evening classes. Thirty-one years later, he took part in the commencement at the university, earning an associate of liberal arts degree. In August 1970, Woodie was awarded a bachelor of science in business at the university.

Later through the Winona State External Studies Program, Woodie decided to continue his education.

Woodie: "I do know that my four and one-half years at evening classes at Winona State were very enjoyable, and gave me the chance to feel right at home in an academic atmosphere. And I made lasting friendships with professors, administrators, and fellow students. It was encouraging to know that young people were interested in knowing why someone at my age and not in the teaching field wanted to expand his educational horizon. I am proud to call WSC my Alma Mater."

Woodie is presently manager of International Multifoods in Wabasha, Minnesota.

Mr. "Woodie" Palmen

Keeping You Informed

At the WSU Alumni Society's annual meeting on April 26, 1975, an alumnus suggested that "WSU Alum" publish a list of the university's degree programs. As this alumnus pointed out, this would be an excellent way of informing alumni of just what their alma mater offers its students. This is particularly important now that WSU, like most other colleges and universities, is encouraging its alumni to tell prospective students about the university. Obviously, it is better for all concerned if an alumnus who talks to a prospective student has up-to-date information.

Several new programs have been added in recent years as Winona State has broadened its range of services. Alumni from the state normal school and state teachers college eras as well as some from the state college era might be surprised at their alma mater's diversity. Today, Winona State is clearly a multi-purpose institution offering programs which meet a wide variety of educational needs.

While some new programs have been incorporated into existing departmental offerings, generally by adding new majors or minors or by constructing new options to existing majors, other programs have demanded a less conventional approach. One such method is to pool the expertise of two or more departments. The Paralegal Program, a joint effort of the departments of business administration, history and sociology, and the Mass Communications program, a cooperative effort of the departments of audiovisual communications, English and Communication and Theatre Arts, are two recent examples of departments combining their resources to offer a new program (see "WSC Alum," Spring 1974). These are but a couple of

isolated examples of Winona State's attempts to broaden its academic offerings.

Following is a list of WSU's degree programs. It is a very general list; it doesn't show the majors and minors or the various options included under these general headings. Shown in parenthesis after each of the four-year programs are the degrees offered under that program. For example, "Accounting" offers only the Bachelor of Arts (B.A.) and "Elementary Education" only the Bachelor of Science (B.S.), while "Art" offers both the B.A. and the B.S. Anyone wishing further information about these programs is encouraged to contact the university admissions office.

Professor Emeritus

At spring commencement, May 19, 1975, Dr. R.A. DuFresne presented professor emeritus awards to: Dr. Frank Van Alstine, Miss Amanda Aarestad, and Mrs. Helen Hammond McGrath.

Dr. Van Alstine joined the faculty of WSC in 1953 and was the first graduate dean of the college. He received his bachelor of science degree from Southwestern State Teachers College, Oklahoma; his master of science degree from Oklahoma A & M, Stillwater; and the Doctor of Philosophy degree from the University of Minnesota. He retired from WSC in 1970 and then served as graduate dean of St. Mary's College, Winona, until 1972. He has served

education as a teacher and an administrator for forty-eight years — seventeen of them at WSC.

Miss Aarestad has been a member of Winona State since 1940. She served as fifth grade supervisor in the Phelps Laboratory School. Since 1950 she taught education courses and supervised student teachers as a member of the department of education. She received her bachelor of education degree from the University of Minnesota. She has done graduate work at Colorado State College, Greeley. She served WSC for thirty-five of her forty-six year teaching career.

Mrs. McGrath joined the faculty at WSC in 1955 as fifth grade supervisor

WSU President Dr. R. A. DuFresne, left presents professor emeritus awards to Miss Amanda Aarestad, Mrs. Helen Hammond McGrath and Dr. Frank Van Alstine.

and junior high school teacher at the Phelps Laboratory School. She taught education courses and supervised student teachers in the elementary and secondary grades for the department of education and also served as the director of the educational aide program at the college. She received her bachelor of education degree and the master of science degree from Winona State. She is presently serving as vice-president of the Iota chapter of Delta Kappa Gamma, a national honor society for women educators.

Things we've heard about you

Classes of 1907-1929

Fannie Longini MacArthur, Diploma, '07, taught in Wabasha, Minnesota and now lives in Hollywood, California. She has three sons and nine grandchildren.

Lela Maxwell Evans, Diploma, '08, is living at the Watkins United Methodist Home in Winona. She previously lived in Montevideo, Minnesota.

Lucinda Goltz Bierce, Diploma, '14, taught for three years in Luverne, Minnesota. After the death of her husband, Herbert, she moved from Winona to Clearwater, Florida.

H. Vigerta Rasmussen, Diploma, '15, spent most of her teaching years in her home town of Willmar, Minnesota.

Linda Wilkens Strelow, Diploma, '15, moved from the farm into her girlhood home in Winona.

Lola Lapham Dibley, Diploma, '18, taught or substituted twelve years in rural schools. She has four children and sixteen grandchildren.

Nann Ashcroft Nelson, Diploma, '18, taught kindergarten in Minneapolis for thirty-seven years before retiring.

Helen Kratz Feery, Diploma, '19, taught upper grades in Mabel, Grand Meadow, Preston, St. Charles and concluded her career teaching fifth grade in the Winona Central School. She and her husband live in Rochester.

Helen Pratt Kronstedt, Diploma, '19, is retired and lives in Minneapolis. She participates in church, AAUW, Rose Society and travels occasionally.

R. Gail Powell Seifert, Diploma, '19, in 1972 wrote "Miles of Memories", a picture of her family's life centering around the turn of the century. This was written to honor her father, born in 1842, a Civil War soldier who came to Stillwater, Minnesota in 1867. He later became a farmer. Included in the "Memories" is a genealogy beginning with her grandparents, natives of England.

Leone M. Smith, Diploma, '19, retired from St. Paul Public Schools in 1968, after forty years of teaching at Groveland Park School.

Fern Rose Swanson, Diploma, '20, retired in 1971 after fifty-one years of teaching. In June 1974 she was elected Department President of Ladies of the Daughters of American Revolution and attended the national Convention in Bretton Woods, New Hampshire in August. She attended Third Plains Reading Meeting in St. Louis in February 1975 and the NAESP convention in Minneapolis in April. She was elected Vice President of District 11 Rebekahs in April.

Lillian M. Kruegel, Diploma, '21, taught for five years in Minnesota. From 1923 to 1958 she taught in Spokane, Washington and now lives there in Riverview Terrace Retirement Home.

Arthur W. Strand, Diploma, '21, taught for twelve years in Minnesota public schools. He finished his bachelor's degree in 1934 and a M.S. degree in 1958 at St. Cloud State College. He then spent two years teaching English and vocational courses at the St. Cloud State Reformatory for Boys. From 1935 to 1946 he was a teacher, a principal, and the dean of boys at Augustana Academy, Canton, South Dakota. In 1946 he moved to Forest City, Iowa, to become business manager at Waldorf College, where he later was a member of the development staff and a teacher. In 1973 he retired from Waldorf as professor emeritus. He is now serving as manager of a small factory which manufactures athletic field markers in Forest City. He and his wife, Muriel, have three sons and one daughter.

Harriet R. Averill, Diploma, '22, lives in Chippewa Falls, Wisconsin, where she taught music for forty years.

Clarence H. Christopherson, Diploma, '22, taught industrial arts eleven years in public schools and agricultural engineering thirty-one years at the University of Minnesota, before he retired in 1965. He and his wife have a mobile home at Lawrence Welk's Country Club Village, Escondido, California.

Elma Bartel Henslin, Diploma, '22, living in Dodge Center, Minnesota, is a historian for rural Pleasant Corners. She has been a member of the church longer than anyone in the congregation.

Henry G. Tiedeman, Diploma, '23, living in Minneapolis, graduated from the University of Minnesota and the University of Iowa. He was employed by the Educational Testing Bureau for six years and the Economy Publishing Company for seventeen years. He is now retired and works part-time at Polar Chevrolet in White Bear Lake.

Adelle Spalding Anderson, Diploma, '25, taught first grade at Wabasha and Lamberton, Minnesota from 1955 to 1970. She is married and has two children and seven grandchildren.

Margaret Raddatz Lehfeldt, Diploma, '25, now living in Ryegate, Montana, went to Montana in 1928 to teach and retired after twenty-eight years, of teaching service, fourteen of which she served as County Superintendent of Schools.

Frances Richards Lynch, Diploma, '25, B.S. Elementary Education, '71, is teaching fourth grade in the Chatfield Elementary School, Chatfield, Minnesota.

Florence Suemper Wiley, Diploma, '25, has two children and three grandchildren. She taught for two years in Lewiston, three years in Winona and nine years in Irvington, New Jersey. For several years she worked as a volunteer in a local hospital. She also worked as a bookkeeper in her husband's coal and fuel company for five years.

Victoria Olund Baker, Diploma, '26, is retired after teaching piano and organ lessons for over forty years. She and her husband reside in Blackduck, Minnesota.

Walter Busch, Diploma, '26, taught eleven years in Minnesota and twenty-six years in San Diego, California before retiring in 1964. Now living in La Mesa, California, he visited the WSC campus in July 1974, fifty years after entering the college.

Olive L. Crocker, Diploma, '26, retired in the fall of 1971 as a social worker with United Charities of Chicago.
